3. The following is an examiner's statement of reasons for allowance: As stated in applicant's response of 09-17-04, the claims now require a two tier system, in which a single housing permanently contains detector and data processing units and a microfluidics is removably insertable into the housing so as to effect an operative communication. The prior art fails to teach or fairly suggest this structure, but rather teaches only a three tier structure in which microfluidics, detection and data processing are accomplished by physically separable units.

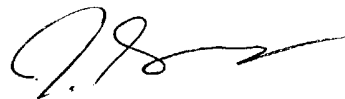

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
